## double speed, double capacity

With the new i-Disk Swing Deluxe 8GB Pretec introduces its new concept of "double speed, double capacity".

After having developed the smallest USB flash drive in the world in 2003, Pretec was now able to double both speed and capacity of this device, without increasing its size!

By further developing this technology in the future, Pretec will continue to globally challenge and set the standards of "highest speed", "largest capacity" and "smallest size" in the field of USB flash memory.
