

The intelligent way to get connected!
Pretec H220 Intellicable™

Super fast and easy to use

- > Connect any computer (Windows/MAC) to the internet in a few seconds via your mobile phone (Phone being used as a modem)
- > Works with most popular mobile phones (2G, 3G, 3.5G)
- > Plug & Play automatic setup without any configuration
- > Compliant with all operating systems and handset platforms
- > Short set-up time and high speed data connections

Economical & Multifunctional

- > Lower cost alternative for an HSDPA modem
- > Support simultaneous voice and high speed data communications
- > Contains 1GB memory space for data storage (files, photos, music...), optional up to 8GB
- > Charges the mobile phone while connected to any computer

Portable & Convenient

- > Compact in size and easy to carry along
- > Includes a robust cable fastener for easy and practical winding

“Easiest way to turn PC screen and keyboard for users to replace small Blackberry & other phone screens and keypads”

“Just plug it into your handset and you’re connected!”

Pretec H220 Intellicable™ is a convenient, practical and economical internet connectivity device. It transforms any mobile 2.5G/3G/3.5G handsets into a modem when connected to any PCs, netbooks or laptops. Intellicable™ holds both hardware and software patented technologies from Pretec and SmartCom. Intellicable™ works automatically with any SIM card on, any network anywhere in the world as well as with any PC/Mac/Linux based Laptop/Netbooks. Compliant with all operating systems, it fulfills users' desire to get connected in a simple, plug & play and quickly access the internet. Intellicable™ can be used as a USB flash drive with up to 8GB memory space as well as a mobile phone charger when connected to any computer USB port.

H220 Intellicable™ supports major mobile phones from Blackberry, Motorola, Nokia, Sony Ericsson... (see below for a complete support list), connecting seamlessly on any network through the handset without any prior configuration. It is a perfect device for frequent travelers, business users requiring a mobile office environment, or, occasional internet users.
